

Message from Chairman of HKCPMA:

First and foremost, I would like to thank the Graduates of Postgraduate Diploma in Community Psychological Medicine (HK) for their joint effort, all speakers for their valuable contribution and Glaxo-SmithKline Hong Kong for the generous sponsorship to this certificate course.

There is a growing population uncovered with mental problems. It is sad but true that mild symptoms do progress to debilitating illnesses without early diagnosis and proper treatment and, ultimately, result in tragedies. The importance of screening patients with mood disorders in daily practice is hence of no secret to anyone, and the Hong Kong Community Psychological Medicine Association (HKCPMA) is keen to take steps to promote early detection of mental symptoms of patients.

Through experience sharing and interactive case demonstration, the coming 6 lectures aim to update general practitioners with practical psychiatry knowledge. At the end of the course, we wish you could acquire skills to recognize and handle the basic psychiatric problems.

Out of the many registrants, priority has been given to doctor members of HKCPMA. Your dedication and commitment is the bedrock to the success of the course. On behalf of the Association, I congratulate you again on your successful enrolment to this certificate course. I sincerely hope that you will find this series of lectures useful to your daily clinical practice.

Dr Aaron Lee Fook Kay
Chairman,
HKCPMA.
